Codeless Architecture
Powered by Unqork

Codeless Architecture frees agencies from IP lock-in with an open-standard paradigm that empowers enterprises to master composability & modernization.

Who we are
Unqork created the new category of enterprise no-code and invented the Codeless Architecture standard that is the future of software development. Our mission is to enable our customers to create applications that power their businesses. With our platform, customers innovate faster & with greater agility, all at a lower cost.

What we do
We have entered a new frontier of software development and it’s codeless—Unqork is the first company to entirely abstract code from the application development process. Unqork stands apart from other low-code/no-code platforms because our Codeless Architecture allows clients to build applications that are visual, modular, and secure. Codeless Architecture provides the foundation for organizations to stay agile and accelerate their business into the future where customer and employee expectations are higher than ever, all without using code.

Unqork’s Codeless Architecture allows the enterprise to compose and manage rapid application delivery that is secure, reliable, and pressure tested. Development cycles for enterprise applications are measured in weeks, rather than in months or years, with no legacy code to maintain over time.

How we help
Integrate all of your systems and data, orchestrate and automate complex business processes, and create modern on-brand customer experiences.

Innovative companies using Unqork are building enterprise applications 3x faster without custom code.
Seamlessly integrate with your third-party integrations and use pre-built Marketplace listings to expedite your application development

Integrate all of your systems & data
- Build an integrated source of truth for your data; eliminate outdated silos and legacy
- Consolidate systems & data with future proof predictable pricing for a fraction of the cost

Increase productivity through automation
- Automate processes to make your teams more productive, saving time and resources
- Deliver rapid outcomes; enhance as IT demands change

Create branded digital experiences at scale
- Deploy consumer-grade experiences to attract and delight your customers
- Flexible styling, reusable UI templates

Example of Onboarding Application
CIOs are spending far too much and wasting too many hours manually tracking forms and documentation inside the government. Ethics officials are becoming increasingly frustrated with how manual the process is, especially as demand continues to increase.

All users at the agency need access to these applications and the users log in a couple of times per year. It is a very expensive proposition to use a low code platform. Using a codeless architecture approach, removing legacy code that is creating a more sustainable business model to managing agency modernization budget. For a fraction of the cost federal agencies and ethics officials can replace manual, time-consuming processes with integrations, automation, and orchestration.

Reliance on legacy manual processes and document-based approaches significantly reduce the value, efficiency, and effectiveness of the Risk Management Framework (RMF). The Unqork platform is specifically designed to help agencies free data from documents, provide insights to your technical landscape, and significantly reduce the time resources required to manage the lifecycle of the RMF.
High-value use cases

**Operations Automation**

**Case Management**
Consolidate systems and data enabling the transformation of traditional administration functions. Eliminate bottlenecks/silos; simplify processes resulting in rapid outcomes. Completely customize the look and feel of your compliance experience, one that is intuitive and secure.

**Human Capital Management**
Programs like EEO compliance and employee onboarding can be arduous and manual for Federal agencies without the right tools in place. Unqork’s Human Capital Management solutions automate manual processes, improve collaboration among stakeholders, and increase overall flexibility.

**Pricing and Licensing**
Low-code legacy licensing models are: outdated, extremely expensive, and many users find themselves paying for way more capacity than they are actually consuming all the while dreading the annual subscription renewal quotation.

**Technology Transformation**

**Business Workflows**
(Orchestration / Ops Automation)
By combining a robust integration framework with sophisticated workflow and rules engines, Unqork makes it easy for agencies to orchestrate complex workflows across all components of their digital ecosystem including new codeless applications, legacy systems (even those built with a traditional code-based approach), and external third-party services.

**Legacy Modernization**
Agencies can use Unqork to build fresh, modern UIs for legacy systems that can be seamlessly integrated into the rest of their digital ecosystem.
Getting started with Unqork is easy

**Academy:**
*Build the skills that will help you digitally transform your organization*
Join your peers and learn how to develop with no-code in no time with robust guided curriculums, certification assessments, courses, and resources

**Community Hub:**
*Connect to all the resources you need*
A fully integrated and self-sustaining community that unlocks the full potential of each Unqork Creator, enabling them to create applications at rapid speed

**Marketplace:**
*Jumpstart your app by building with the best*
Using the Unqork Marketplace, users can easily surface and integrate enterprise-grade pre-built snippets, templates, integrations, and accelerators designed by industry experts, Unqork technology partners, and fellow Creators
