

Corporate Overview

Unqork’s mission is to enable every organization to unlock their competitive advantage.

ABOUT

Unqork is the industry pioneer enterprise no-code application platform that helps large companies build, deploy, and manage complex applications without writing a single line of code. Companies like Liberty Mutual, Goldman Sachs, and John Hancock are using Unqork’s drag-and-drop interface to build enterprise applications faster, with higher quality, and lower costs than conventional approaches.

PRODUCT

Enterprise technology leaders have always been forced into a tradeoff. Simple applications can be built with “drag and drop” tools, but more functionality requires a variety of specialized tooling, expensive developers, and, most importantly, lots of custom code. The result is project failures, legacy maintenance, difficulty hiring, and, most importantly, too much time spent simply maintaining the status quo.

Unqork doesn’t force you into this tradeoff. Combining a completely visual, no-code interface with the power of a truly enterprise-grade application platform, Unqork lets you build complex software without having to write a single line of code. The result is faster time to market, improved quality, and reduced cost that’s just not possible with conventional tools.

COMPANY BASICS

Founded	2017
Founder	Gary Hoberman, Former CIO of Metlife
Employees	500+
Headquarters	New York City
Investors	CapitalG, Goldman Sachs, BlackRock, World Innovation Lab, and others
Total Funding	\$400m+
Annual Revenue Growth	300%+

COMPETITIVE DIFFERENTIATORS

- **Unified Application Platform:** Unlike building with traditional approaches, Unqork brings everything you need to build complex enterprise applications onto a single platform that’s integrated, secure, and easy to use.
- **Completely Visual Interface:** Many of today’s solutions claim to be completely visual (“no-code”), but in reality they require a tremendous amount of code to build complex applications. Unqork lets you build complex applications in a truly visual environment. This dramatically accelerates build times and lowers total costs.
- **Enterprise-Grade Security and Scale:** Unqork has very large deployments in some of the most complex regulated industries, which is unique for a no-code platform.

Key Benefits

Accelerate Time to Market

Unqork speeds up initial builds without sacrificing quality or loading up legacy expenses. In fact, with similar use cases Unqork has been shown to deliver software up to 90% faster than traditional approaches.

Improve Quality

A completely visual interface opens development to more stakeholders, so everyone can collaborate on their requirements.

Reduce TCO

Large enterprises can spend up to 75% of their IT budget just maintaining existing systems. With Unqork, changes can be made with far fewer resources.

Unlock Innovation

Because projects can get ramped up quickly and with lower costs, your organization can experiment without the burden of traditional development projects.

Engage Employees

Keep specialized engineers focused on the most complex projects that might require code. Complete more straightforward (but still important) projects with business-led teams and fewer technology resources.

Maintain Peace of Mind

Security, compliance, RBAC, and infrastructure are all maintained and monitored out of the box, allowing your teams to focus on other projects.

CUSTOMERS

Unqork customers include some of the largest and most complex organizations in the world. Current customers include Liberty Mutual, Goldman Sachs, Principal Financial Group, New York City, Manulife, Maimonides Medical Center, and Washington, D.C.

PARTNERS

Unqork partners with some of the most respected and reputable system integrators. Existing partners include Deloitte, KPMG, Capco, EY, and many more. From a technology perspective, Unqork maintains alliances with AWS, Google Cloud, DocuSign, Plaid, and more.

About Unqork

Unqork is the industry pioneer no-code enterprise application platform that helps large companies build, deploy, and manage complex applications without writing a single line of code. Organizations like Goldman Sachs, Liberty Mutual, the Cities of New York and Washington, DC and Maimonides Medical Center are using Unqork's drag-and-drop interface to build enterprise applications faster, with higher quality, and lower costs than conventional approaches.
